About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to Hot Air Dryer

We at KERONE design, manufacture and export across world various kind of hot air dryer and hot air Infrared Dryer having specification such as wavelength of Infrared, proper air circulation arrangement, Roller/conveyor speed, formation of temperature zones to fit into your drying process requirement, we hold our expertise in designing the hot air infrared dryers which is combination of both convention hot air drying oven and Infrared drying oven.

Hot air dryer and hot air Infrared Dryer depending upon your application are designed with the superior quality material with digital control panel. hot air dryer and hot air Infrared Dryer are more suitable for automobile sticker drying, also widely used in printing industry, these are ideal equipment for screen printed stickers on PVC.

Fabricated using the best quality material, these are known for energy efficiency and low operating cost. Incorporated with advanced features, our dryers provide unique air distribution which guarantees uniform drying.

Features

- Uniform air distribution
 - Insulated construction for saving energy
 - PID temperature controller for precise temperature control
 - Unique design to prevent material blockage and hence can suit to regrind and dusty material.
 - Double skin insulated.
 - Forced airflow speed up drying/curing process.
 - High-volume circulation blower reduces energy costs.
 - Separate dedicated blowers for circulation & exhaust
- Control Center
-
