About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to IR Vacuum Heating Systems

Infrared heating system by KERONE is a reliable heating source, having capability to transfer large amount of heat in shorter time, and easy switch on and off mechanism helps in saving of energy required for as source of firing.

As infrared waves travels through the air and water, no need of direct contact with the material under process. With small change in structure the Infrared heaters can be made suitable for the Vacuum operational condition.

Reflectors of superior design and performance with side, bottom and tilted shield options

- Run indicator light
- Couplings that outperform all others
- Burner housing with no loose service doors
- Filters are easily changed even with outside combustion air fitted
- Vacuum pumps are corrosion resistant, heavy duty construction with several sizes available to best match the system
- Decorative grills can be installed as an option

www.kerone.com/infrared-vacuum-heating-systems.php

Applications

- Heating wafers in de-gassing and annealing processes
- Drying of products in vacuum chambers
- Coating processes in vacuum chambers
- Food packaging
- Plastic forming

Features

- Low voltage
- Sealed heaters
- Tungsten or carbon
- Fire polished for clean room conditions
- Single or double-ended lamps
- Molybdenum wire connections
