About Kerone

KERONE now renowned name in serving specialized need of customers with best quality and economical process Heating /cooling and drying products, manufactured in high quality environment by well trained and qualified workforce(special purpose machineries) .

KERONE is pioneer in application and implementation engineering with its vast experience and team of professionals. KERONE is devoted to serve the industry to optimize their operations both economically and environmentally with its specialized heating and drying solutions.

“Enhance the value of customer operation through our customer need centric engineering solution”

Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.

Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

Introduction to

Microwave Solid Tyre Pre-heating Systems

We have worked with multiple rubber processing plants which had made us very acquainted with the need and future demand of the rubber and tyre processing industries.

The new era of higher quality product in lesser time does not fits the conventional preheating and heating system that these industries are using at present hence to equip the industry with best of machinery to complete the process, we adopted the Microwave technology this made the total process of heating and drying very quick and efficient.

We are providing solution that can be used for rubber mixing, extrusion, milling and curing machinery to tire and rubber producers worldwide.

Whether you want to add rubber machinery to an existing line, or install a complete line, we are at your disposal for any of your technical queries you have. We would be glad to share our experience in rubber processing solutions and to provide you full technical support and equipment supply to fulfill your needs.

kerone/microwave-rubber-curing

Advantages

- Fast and uniform heating
- Selective heating
- Direct utilization of large-sized feedstocks
- Treatment of non-homogeneous wastes
- Waste reduction and material recovery
- Better production quality
- New materials and products
- Energy efficiency
- Overall cost effectiveness/savings
- Improved process control
- Ability to operate from an electrical source

Features

- Longer functional life
- Low and easy maintenance
- Dense construction
- Quick and Easy installation
- Precisely designed and engineered
- Hassle-free functioning
- Longer service life
- Rugged construction
- High durability
- Energy and Cost efficient
- Power saving
- Efficient performance
